

SINOWAY Newsletter

Nov., 2025

☆Market information

1. Holiday Shipping Guide: Plan Early for On-Time Delivery

With the peak Christmas holiday season approaching, outbound shipments from major Chinese ports are increasing, leading to tightening space and equipment availability on certain routes. To ensure the timely delivery of your goods, we strongly advise finalizing your orders and arranging your shipping plans in advance. Early planning is crucial to avoid peak-season delays and secure more favorable freight rates.

2. SINOWAY's CPhI Journey in 2026

SINOWAY is pleased to announce our official participation in **CPHI events in 2026**. We look forward to meeting our global partners, clients and industry peers to exchange insights, especially on APIs, advance intermediates, cosmetic raw materials and food supplement ingredients, as well as our innovative CDMO solutions. We cordially invite our partners and clients to visit our booth to explore new opportunities and lasting collaboration.

- **Apr. 21~23,2026** CPhI Japan (Tokyo), Sinoway booth No.: 2D-34
- **Jun.16~18,2026** CPhI China (Shanghai), Sinoway booth No.: E1D57
- **Oct. 06~08,2026** CPhI Worldwide (Milan), Sinoway booth No.: 10H67

☆New Product Recommendation

This month, here we introduce our competitive **PDRN(PolyDeoxyRiboNucleotide)** as below:

PDRN (Polydeoxyribonucleotide) is a natural bioactive ingredient derived from specific species' DNA fragments. Boasting a 98% structural similarity to human DNA fragments, PDRN exhibits excellent biocompatibility, enabling efficient cellular recognition and utilization, and is consequently considered clinically safe with no significant toxic side effects reported.

PDRN's Core Efficacy

- 1. Repair and Regeneration:** PDRN acts as a "raw material" that directly integrates into damaged cells, activating their self-repair mechanisms and promoting tissue regeneration.
- 2. Anti-inflammation and Anti-aging:** By activating adenosine A2A receptors, PDRN effectively regulates inflammation, inhibits apoptosis, and stimulates collagen synthesis, thereby improving skin elasticity, reducing wrinkles, and strengthening the skin barrier.

SINOWAY'S Advantages of PDRN:

1. High quality:

- **Injection grade:**

Source: Salmon,

Assay: **99.0% up** by HPLC, **Bacterial Endotoxin < 0.05%;**

- **Cosmetic grade:**
Source: Either from Salmon or plant(Rose,Brown algae etc.)
Assay: **99.0% up** by HPLC or **5000ppm up**
 - 2. **Documents: USDMF, ISO9001, ISO13485, KOSHER,HALAL**
 - 3. **Large capacity:** 5mt/year
 - 4. **Much competitive price: 30% lower** than average level.
- * **SINOWAY can supply PDRN** with fiber or powder white solid, or Liquid according to the customer's request
- * **SINOWAY can supply customized PDRN production from various plants.**
- * **SINOWAY could also supply PN (CAS:9007-49-2)**, which is a more advanced, second-generation form of PDRN that contains both DNA and RNA fragments,with longer polymer chains with a higher concentration of regenerative properties than PDRN. Our PN is available for injection grade and cosmetic grade with above same advantages.
